

5 ZONE ADJUSTABLE DEPTH FLEECE FILTER BAFFLE KIT

Thank you for choosing our Adjustable Sump Baffle Kit

First, please inspect all parts. The following parts should be in the package:

- | | |
|--|---|
| 1.) Inlet Plumbing Guide Plate (optional)* | 5.) Water Level Baffle |
| 2.) Filter Baffle | 6.) Bubble Trap Baffle |
| 3.) Middle Baffle | 7.) Two (2) 1/2" x 1/4"-20 Black Nylon Thumbscrews |
| 4.) Water Level Adjustment Plate | 8.) Two (2) Bubble Trap Filter Media Supports (40 & 60 Breeder Kits include three(3)) |

If anything is missing or damaged in shipping please contact us ASAP for a replacement. Our contact info is below, or you can contact us through our Ebay store at <https://www.ebay.com/str/marinebiosystems>.

Before installation please check the fit. There is variation in size from tank to tank and the baffles should fit the tank as shown above without binding and without more than 1/8" on either side when centered between the glass planes. If you think the fitment is off please contact us ASAP and we'll work out a correction. **Do not attempt to glue in without checking fitment first, we cannot accept returns once you've attempted to glue them in.**

To install, remove all protective coverings from the parts (parts should be black or clear). We recommend dry fitting the baffles with any equipment you want to use in the tank in place. Once you have the baffle locations finalized, seal them in with aquarium safe silicone and let it cure 24 hours. To make installation easier you can mark the baffle positions on the outside of the tank with a felt tip marker (sharpie). Those marks can be removed after install with rubbing alcohol. The baffles can also be held in place while you silicone by tacking them down with a small dab of cyanocrylate glue (super glue, corafix, etc.) on the bottom edge of the baffle.

* Optional plumbing guide plate with customer specified hole count and size

If you need any other acrylic products for your aquarium we welcome you to shop at <https://www.ebay.com/str/marinebiosystems> or contact us directly. We offer a wide variety of products and build custom items to order.
